

The Laminate Worlds of Classen

Fast. Easy. Megaloc.

Laminate Worlds with Megaloc-installation system

CLASSEN
megaloc

fast & easy

Megaloc is new. Megaloc is unique. Megaloc is certainly the world's fastest and easiest installation system. Laying your CLASSEN laminate flooring will be child's play with this latest glue-free installation system. The roof tile principle of installation means that a special locking mechanism on the short side is superfluous.

Simply place the board in the groove of the previously laid row. As it is lowered, the laminate floorboard will be locked in with the previously installed board. Finally, just press your thumb quickly on the cross bevel and it's ready!

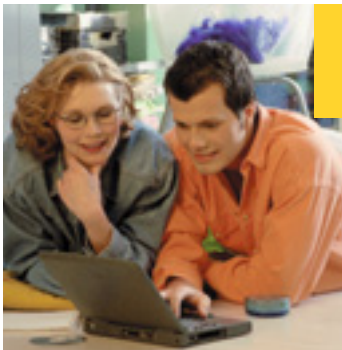

The principle: Classen megaloc
The application:
Classen laminate flooring

Select laminate flooring,
quick and easy to lay

Style Structure

The structured floor surfaces of the Style-World-Collection produce a distinctive feature.

The thickness of the floor panel is only 7 mm nevertheless, the surface has an amazing structure that is pleasant to the touch.

The flooring with the matt surface structure also creates a special

effect and gives the Style World its own special characteristic.

Floors in the CLASSEN Style World range are recommended for private residential use, featuring utilisation class 31/3.

Premium World – the big extravaganza

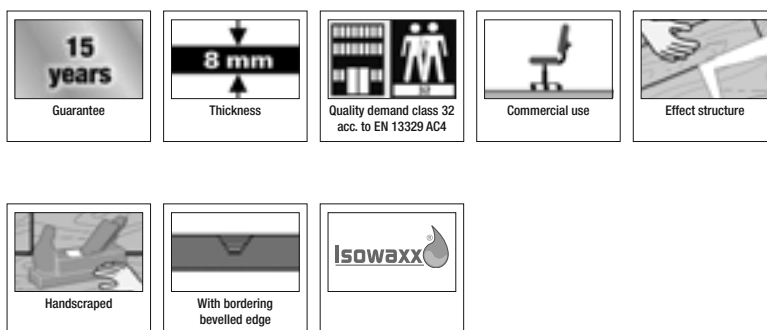

The best days of our lives – wedding, trip to the opera, fancy clothes – and to match this CLASSEN Premium World provides the ample array of a high-end collection.

Laminate flooring in its perfect form, the fine art of craftsmanship: The effect of the structured flooring is characterised by a surface relief that is pleasant

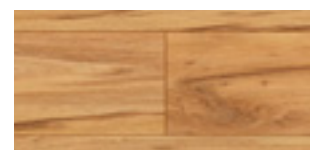

to the touch. The surrounding chamfer provides the Premium World flooring with its high quality look - simply first class.

For flooring with a handscraped effect, the appearance of freshly scraped young boards that were installed right away was replicated.

The softer bevels become compacted, little by little, as people walk on the floor.

Nebraska Oak Full Plank

Art.-Nr. 25964
Fresco Full Plank

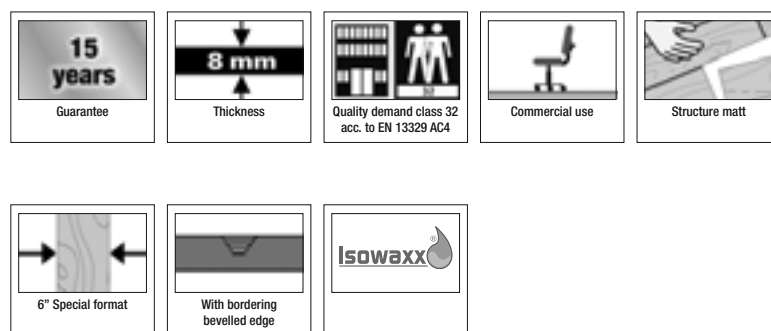

The indentations created over the years, in conjunction with the raised areas constitute the particular charm of such a floor, and also of this laminate flooring. The bevelled edge rounds out the appearance of an old wooden plank.

The 6 inch wide typical format of a classical floor board experiences a renaissance

in the CLASSEN Premium World.

The surrounding chamfer underscores the natural look of a traditional floor board after it is installed. The colour interaction of the six inch flooring has a remarkable affect due to the mat structure of its surface.

Classen Megaloc – set, lock it in and done!

CLASSEN megaloc is super easy,
super fast and super strong.

CLASSEN megaloc was developed
and optimised for the easy installation of
laminate flooring. This is where the
installation concept with the lock clip
system proves its superiority.

Try CLASSEN megaloc for yourself.
You will discover: This way laying floors
is fun.

- During the installation, ISOWAXX® seeps into the connecting joint and automatically seals it.
- For optimal protection from water ingress from above.
